☒ Data Set: Customers Dataset Parameter Binding...

☐ Report Item:

Data Column Binding:

Name	Display Name	Data Type	Expression	Aggregate On
CUSTOMERNAME		Any	dataSetRow["CUSTOMER...]	N/A
PHONE		Any	dataSetRow["PHONE"]	N/A
CONTACTFIRSTNAME		Any	dataSetRow["CONTACTFI...]	N/A

Add...  
Edit...  
Remove

## Select Report Item Option for data binding

Property Editor - Table x Problems

Properties Binding Map Highlights

☐ Data Set:  Dataset Parameter Binding...

☒ Report Item:

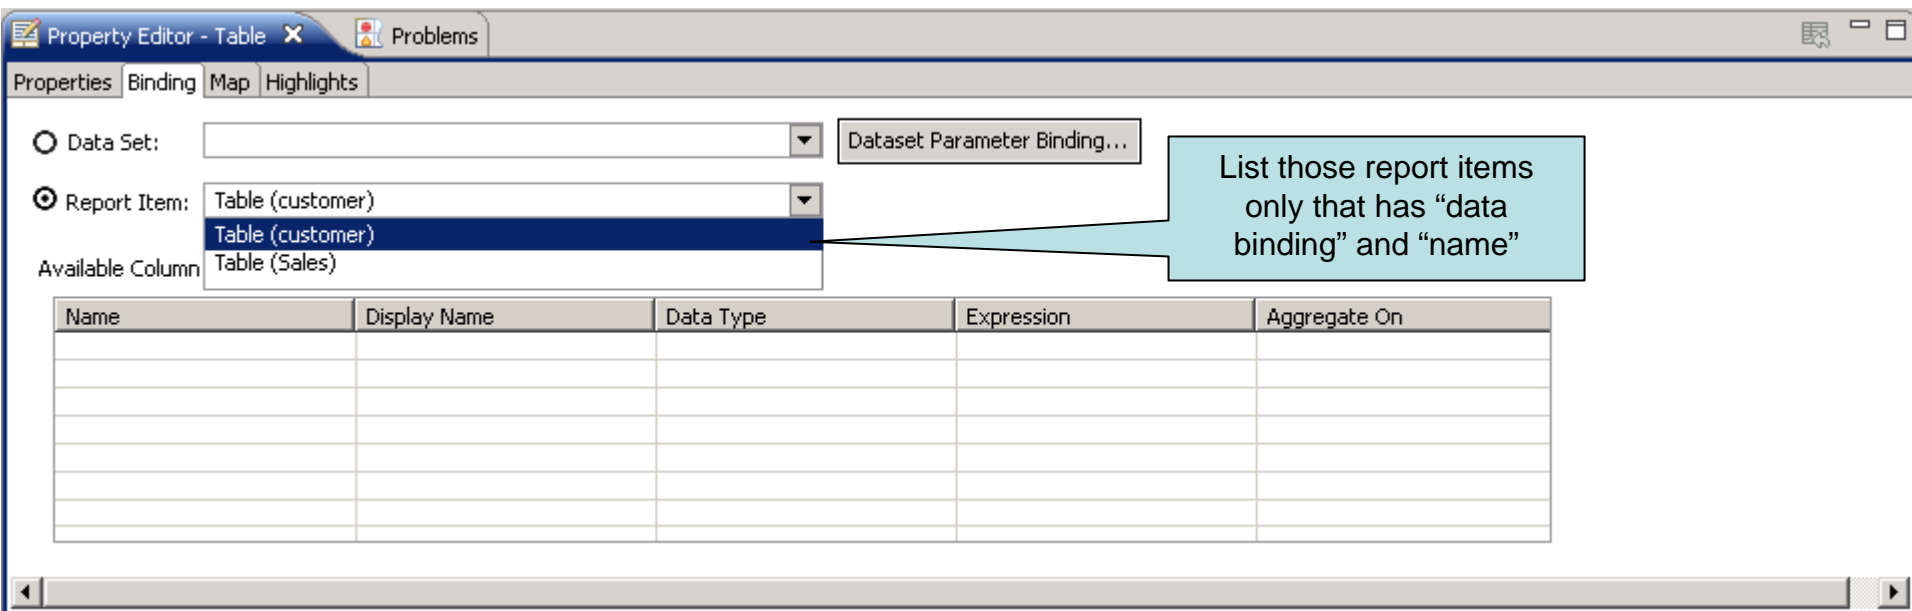

Available Column Binding:

Name	Display Name	Data Type	Expression	Aggregate On

### Notes:

1. Tabs like sort, group and filter will not be shown.
2. Data Column Binding details will be read only with no buttons to edit, add or delete.
3. Instead of Data Column Binding the title should read 'Available Column Binding'.

All Report Items to which an item can bind to will become available in drop down list

Selection from drop down will take effect as Column Binding

The screenshot shows the 'Property Editor - Table' window with the 'Binding' tab selected. It features two radio buttons: 'Data Set' (unselected) and 'Report Item' (selected). The 'Report Item' dropdown is set to 'Table (customer)'. Below this is a table titled 'Available Column Binding:' with columns: Name, Display Name, Data Type, Expression, and Aggregate On. The table lists five columns: CUSTOMERNAME, CONTACTLASTNAME, CONTACTFIRSTNAME, CITY, and POSTALCODE, all of type String. To the right of the table are three buttons: 'Add...', 'Edit...', and 'Remove'.
